Efficient

Connection Everywhere

Enterprise Profile

Zhejiang Longpai Electric Co., Ltd. was founded in year 2000, located in the "Chinese Capital of Electric Appliances"--- Liushi Town, Zhejiang Province. Specialized in connecting industries, the company has three brands now, they are Blox, BLOXCONNECT and LONGERKESI. After more than 22 years' development, now we have 11 different product lines. Our factory has 11000 m2 production area, with annual manufacturing capacity of 180 million units.

Adhering to the motto of "Efficient Connection Everywhere", our company never stops improving itself. Now we have built our own R&D center, and mould designing, plastic injection, hardware workshops as well as automatic assembling production lines. We can not only produce existing high quality products, but also meet customer's requirements of OEM and ODM products. What's more, we've obtained the UL, TUV, CB, UKCA, CE, CQC, RoHS and REACH certifications, which ensure our products can satisfy different market requirements

Relying on excellent products quality and satisfactory customer services, we share the great reputation and high brand awareness in both domestic China and overseas markets. We have already built good business relationships with hundreds of companies from more than 60 countries and areas all around the world, and formed a global sales network.

[MAIN TERMINAL BLOKCS]

> The FJ-P series main terminal blocks, are standard products to electricians, which with modular and space-saving designs. It can be widely used in all different electrical units, offering universal solutions. Main terminal blocks can distribute main lines to other units, like distributors, fuse elements, and circuit breakers etc.

 **blox**
EFFICIENT CONNECTION EVERYWHERE

[UNIVERSAL TERMINAL BLOCKS]

>Universal terminal blocks are creatively made of aluminum. It is suitable for both aluminum and copper conductors. Therefore, it can be used for transition between aluminum and copper conductors without any extra cable clamps.

[FJ-E16 SERIES]

Used for Al/Cu conductors from 2.5mm² to 50mm²

[POWER DISTRIBUTION BLOCKS & TERMINALS]

> Blox-electric offers a wide range of Distribution Blocks, Power Blocks and Power Terminals from single pole to four pole. The blocks can offer different wiring solutions with visual inspection to allow for confirmation of connections to a wide range of conductors.

[POWER BLOCKS & TERMINALS]

Popular in power systems and solar energy solutions. The inner metal parts are made of high-grade tin-coated brass, which provides stable and perfect electrical performances. The transparent cover design can show every inner connecting details while using.

[SINGLE POLE DISTRIBUTION BLOCKS]

Can be mounted on both 35mm rails and mounting plates. The tin-coated brass is also available for aluminum wires. Jumpers can be used to connect two or several neighboring blocks (FJ125A&FJ160A).

DISTRIBUTION BLOCKS

[TWO POLE DISTRIBUTION BLOCKS]

This series distribution blocks have two independent poles, between different poles there is a transparent partition plate to keep the connection safe. Meanwhile the covers can be removed during wiring, which provides better convenience.

[FOUR POLE DISTRIBUTION BLOCKS]

This series distribution blocks are similar to two pole blocks, but have four independent poles. Between different poles there is a transparent partition plate to keep the connection safe. An extra neutral bar can be used to typical items.

DISTRIBUTION BLOCKS

Usage of Neutral Bar

[SCREW TYPE TERMINAL BLOCKS]

- > Screw type terminal blocks are the featured products with complete categories and universal accessories, as well as the most popular series.
- > Screw connection is an economic connection solution and help to reduce your costs.

[UNIVERSAL SCREW TYPE TERMINAL BLOCKS]

Universal screw type terminal blocks, the metal parts consist of high-grade, corrosion-proof brass alloys, the insulating housings are made of recyclable nylon 66. Tightening the screw, the pressure frame rises up, the self-locking system of screws prevent the conductors from loosening in the shock environment. They are widely used in automation, electricity, transportation, energy and chemical industry etc.

[CLOSED SCREW TYPE TERMINAL BLOCKS]

Closed screw type terminal blocks are Bloxconnect's patented products. It has double-face closed design, in this way users don't need end plates anymore which can save a lot of costs. Meanwhile, the closed design is able to prevent the inner metal parts from dusts during transportation and installation, directly improved the electrical performances.

[DOUBLE DECK SCREW TYPE TERMINAL BLOCKS]

Allow four conductors to be connected on two independent potentials. The upper level is offset laterally by half of the terminal blocks thickness, this provides better visibility to the lower markers and connection points.

[FOUR-CONDUCTOR TERMINAL BLOCKS]

Are available to accommodate four conductors on one potential, the potential branches two connection points on each side.

[THREE-CONDUCTOR TERMINAL BLOCKS]

Have two separate connection points on the current output side. It can be aligned in rows with neighboring universal screw type terminal blocks.

[MINI SCREW TYPE TERMINAL BLOCKS]

Adopt compact design, can be mounted on 15 mm rails, effectively saved installation space. They are very popular in small control boxes or panels. Standard connection accessories are also available for this series terminals.

[LEVER-TYPE FUSE TERMINAL BLOCKS]

The hinged disconnect levers are with limit stop for fine fuses, this is available with a light indicator which signalizes when the fuse blows.

[SCREW-CAP FUSE TERMINAL BLOCKS]

The fuses are inserted in the terminal blocks together with the screw cap, are available with and without light indicator.

SCREW TYPE TERMINALS

[KNIFE DISCONNECT TERMINAL BLOCKS]

Knife disconnect terminal blocks are easy to rapidly localize faults and to permit inspection work to be carried out under zero voltage conditions, widely used in measurement, regulation and control systems.

[TEST TERMINAL BLOCKS]

Test terminal blocks have one disconnect slide and two auxiliary test points, make all relevant test connections in current transducer secondary circuits extraordinarily easy to use.

SCREW TYPE TERMINALS

[SPRING TYPE TERMINAL BLOCKS]

- > Spring type terminal blocks are the featured products.
- > As the earliest researched series, Bloxconnect invested much effort and money, the spring-clamp technique has taken great development and has been in the ahead among the field.

[FJ1 SERIES SPRING TYPE TERMINAL BLOCKS]

FJ1 series spring type terminal blocks, adopt front-entry connection, a screwdriver is enough in wiring operation. The conductor and screwdriver come in parallel from the same direction, thereby get the best visibility to the connection point. After the conductor is inserted into the connection compartment, the screwdriver is removed and the conductor automatically realizes connect tightly. The outstanding feature is easy, fast operation and time saving .

SPRING TYPE TERMINALS

[ANGLED SPRING TYPE TERMINAL BLOCKS]

Angled spring type terminal blocks are the same as FJ1 series terminal blocks, adopt front-entry connection, but with angled design. This design makes better use of limited wiring space, and provides users better experiences.

[MULTIPLE DECK SPRING TYPE TERMINAL BLOCKS]

Allow several conductors to be connected on two or three independent potentials. The different width design of each deck as well as the unique marker carrier, can serve great convenience to users. Meanwhile it can also save a lot of installation space.

SPRING TYPE TERMINALS

[FJ2 SERIES SIDE THROUGH SPRING TYPE TERMINAL BLOCKS]

FJ2 series side through terminal blocks, adopt side-entry connection, a screwdriver is enough in wiring operation. The screwdriver comes in the operation groove from the front and pushes the spring element, the conductor is inserted in the connection compartment from the side, the screwdriver is removed and the conductor automatically realizes connect tightly. They are widely used in communication, machine tool, automation, control system etc.

[MINI SPRING TYPE TERMINAL BLOCKS]

FJ3, FJ4, FJ5 series mini spring type terminal blocks could meet the increasing demands for smaller electric connection solutions. The outstanding characteristic is their compact construction design for a narrow wiring environment, makes space-saving to the extreme. Also offer 4-conductor type.

[FJ6 SERIES SPRING TYPE TERMINAL BLOCKS]

FJ6 series spring type terminal blocks, adopt front-entry connection method, the connection principle is the same as FJ1 series. Also create vibration-proof, corrosion-free, maintenance-free and time-saving connection with long-term stability. The current-carrying metals consist of high-grade copper alloys, the spring elements are made of high-strength tin-coated spring steel. The 3-conductor type and 4-conductor type allow multiple conductors to be connected on one potential.

[SECTIONAL TERMINAL BLOCKS]

> Sectional terminal blocks are the featured products with very large conductor cross sections and current ranges. The maximum load current can be up to 370A . In addition to the terminal blocks for rail mounting, the high current terminal blocks also can be assembled onto the mounting plate directly.

[FJ-W SERIES UNIVERSAL TERMINAL BLOCKS]

FJ-W series universal terminal blocks, the insulating housings are made of halogen-free and high-grade PC, this material is cheaper than PA66, your sourcing costs can be reduced considerably. The transparent dust cover for each type provides better visibility to the inside of the terminal blocks and more convenient to inspect and repair.

[FJ-T SERIES FAST-MOUNTING TERMINAL BLOCKS]

The outstanding feature of FJ-T series fast-mounting terminal blocks is their auxiliary assembly keys, users are able to mount and remove the terminal blocks fast. A further characteristic is end plates unnecessary.

[DOUBLE DECK TERMINAL BLOCKS]

Double deck terminal blocks, are available to be mounted on the DIN rails or onto mounting plates directly. Allow four conductors to be connected on two independent potentials. The upper level is offset laterally by half of the terminal blocks thickness, it's more convenient to wire connections.

[BUSBAR TERMINAL BLOCKS]

> Busbar terminals are widely used in construction, electrical devices such as low-voltage power box, distribution box, illuminated box etc. Manufactured by high-quality imported materials which allow low power consumption and low temperature rise.

[BRASS TERMINAL BLOCKS]

> Brass terminal blocks are mostly used in electrical panels or power systems, made of selected brass and nylon 66. The stability and safety are much better than similar products in the market.

[NEUTRAL TERMINAL BLOCKS]

> Neutral terminal blocks are developed for special purpose of neutral linking in electrical panels and equipments, ranging from 60A to 250A. Neutral link for current condition less than 100A, and neutral break for more than 100A in case there is any necessary to make an isolation break. Made of selected brass and nylon 66.
